

NEWSLETTER 2020

Greetings!

We hope this newsletter finds you well and that you've had a relaxing, blessed summer season. Because you're an important part of our PfHU family, we thought as always, you'd love to know about the PfHU activities and projects in Uganda - Kititi village.

Dr. Baker and the Mobile clinic

PfHU medical team - Dr. Baker visited Kititi village dispensing medication after proper diagnosis, de-worming the little children, family planning and birth information and conducting preventative activities such speaking to our community about the importance of hand washing, boiling drinking water among others. It's such a wonderful team. Kititi community is so grateful to PfHU - all medical services are offered free of cost to the patients.

Food parcels and home schooling materials

Thank you from the bottom of my heart for all the supplies especially the food packages you finance monthly to our vulnerable people and for the home schooling materials for our Cornerstone primary school children. As I always say, without the PfHU food relief and medical funds, we would have had a hard time at Kititi village. Am glad now families are able to have a hot meal or two during this difficult

time of Covid-19. We only wish you could see the smiles on the women's and children's faces and how appreciative they are for their food packages.

Evans - special needs child with Malaria

PfHU for years has been helping directly to children with disabilities and learning difficulties in our surrounding community and to the families affected, as you know in Uganda there are virtually no services or infrastructure to serve those with physical or mental disabilities. Evans is one of the lucky ones who has been helped by PfHU to attend Cornerstone school in Kititi village. But during Covid-19 outbreak the school was closed and he had to stay home, however life isn't all that good at home as the family is struggling to make ends meet. Of recent, Evans was down with malaria, but I thank God they called me and I quickly rushed there and we took him to a nearby clinic and she was given a proper medication and steadily improving. Dr.Baker is carefully supervising him.

I wish you all the best during this festive season.

Please keep safe.

If you want to have more information or questions about PfHU, please feel free to reach out to our Project Director.
